## PROFESSIONAL SUMMARY

Senior Android Engineer with 5+ years building and shipping high-quality mobile apps with Kotlin, Jetpack Compose, and modern Android architecture for high-profile clients including Real Madrid, Atresmedia, INDITEX, and GPS Insight. Skilled in architecture, apps from scratch, CI/CD, Kotlin Multiplatform (KMP), AI/LLM integration (Gemini, Grok), and AI-powered workflows (GitHub Copilot, Cursor, Claude Code).

## TECHNICAL SKILLS

**Languages** | Kotlin, Java, SQL, XML, Groovy, Kotlin DSL
**Android & UI** | Jetpack Compose, Material Design 3, Navigation Compose, Kotlin Multiplatform (KMP), Compose Multiplatform, Android TV
**Architecture** | MVVM, MVI, Clean Architecture, SOLID, Modularization, Hilt, Dagger, Room, DataStore, Coroutines, Flow, RxJava
**Tools & AI** | Android Studio, Git, CI/CD, Gradle (KTS), JUnit, Espresso, Mockk, SonarQube, Firebase, Gemini API

## WORK EXPERIENCE

**Senior Android Engineer** — **May 2026 – Present**
Knowmad Mood (Atresmedia) — Remote, Spain

- Developing Android applications for Atresmedia, one of Spain's largest media groups, across both the mobile app and the Android TV app
- Expanding my Android expertise to Android TV, adapting UI and D-pad navigation to the living-room viewing experience

**Senior Android Engineer** — **Oct 2024 – Apr 2026**
Softtek (Real Madrid Official App) — Remote, Spain

- Developed the official Real Madrid app with Kotlin and Jetpack Compose (Material Design 3), delivering real-time match coverage and live scores to millions of global users
- Drove architecture decisions and legacy migration (Views to Compose) while maintaining 85%+ test coverage, accelerating delivery with AI-powered workflows (GitHub Copilot, Cursor, Claude Code)

**Senior Android Engineer** — **Oct 2022 – Oct 2024**
GPS Insight (FieldAware & Driver App) — Remote, Ireland

- Led the GPS Insight Driver app from scratch, defining the full architecture (MVVM, Clean Architecture, modularization) and achieving a 99%+ crash-free user rate
- Built a full CI/CD pipeline with automated testing and bundle distribution (Firebase, Play Console), and migrated the legacy Java FieldAware codebase to Kotlin, mentoring the team

**Senior Android Engineer** — **Mar 2022 – Oct 2022**
Passporter (Travel Tech Startup) — Remote, Spain

- Led Android development for a travel-tech startup with Kotlin, MVVM, and Clean Architecture, integrating RESTful APIs (Retrofit, RxJava) with offline-first caching

**Mid Android Engineer** — **Jun 2020 – Mar 2022**
NTT DATA (INDITEX Client) — Remote, Spain

- Developed internal warehouse logistics Android app for INDITEX using Kotlin and Java, enabling real-time shipment tracking across stores and warehouses
- Implemented comprehensive UI and unit testing (Espresso, JUnit), maintaining high coverage and app stability

## EDUCATION

**B.Sc. Computer Software Engineering** — **2016 – 2020**
University of Huelva — Spain

## PROJECTS & CERTIFICATIONS

**Rugumap (KMP)** | Android & iOS app for CSIC/ICMAN (Cádiz) to map the invasive Rugulopteryx alga along the coast
**AI Integration** | Published Android app with an AI chatbot integrating Gemini & Grok APIs (Google Play Store | App Store)
**Certifications** | KMP & Compose Multiplatform (2024), Firebase for Android (2023), Jetpack Compose Ultimate (2022)
**Languages** | Spanish (Native), English (Professional), French (Basic)
